## About ME

I'm a motivated and dynamic software developer and a lecturer who is in love with making open-source projects, finding solutions to problems and building a community. I enjoy learning and making sure that the present generation is impacted with the skills necessary to become successful in their career. I am open to ideas, projects, startups and the opportunity to create an impact in this present century.

---

## Software Developer

Seasoned professional Software Engineer with expertise in developing and architecting Full-stack applications. Leveraging expertise in ReactJS and proficient in NodeJS for building pixel-perfect UIs and designing robust, and scalable code aligned with good coding principles and patterns.

---

## Technologies Used

**Front-end Development:** React.js, Next.js, TypeScript, Redux, ECMAScript, Design Patterns, styled-components, emotion, Bootstrap, Material UI, TailwindCss

**Back-end Development/Database:** Node.js, Mongoose, Git, MongoDB, MySQL

---

## Professional Training

**Full Stack Developer • Stoic Bible,**

- Together, my brother and I ideated, designed, and built [Stoic bible](#), an app that brings together the works of the ancient stoics in one place
- Designed sophisticated user interfaces for the different features of the app, such as reading, journaling, highlighting, and bookmarking.

**Google Africa Developer Scholarship**

- I went through a training in 2020 where I was trained in Mobile web technologies. I went trained to use Angular and also collaborated with other team members.
-
